**Siemens presenterar -**

### **DynaCT in interventional oncology – do you really need it?**

*Tobias F. Jakobs, MD, Associate Professor, Hospital BarmherzigeBrüder, Munich*

3D soft-tissue imaging in the Angio suite using syngo DynaCT enhances procedure planning with the most recent topographic information. In addition, it supports in decision making about therapy end points and allows to accurately documenting treatment results. Get the tips and tricks on how to use flat-panel CT in every-day angiographic procedures to make your interventions safer and achieve optimal clinical outcomes.
